

# Sprint 1 Review

Dante -

Good: REFAMILIARISED WITH RELEVANT Team PROGRAMMING LANGUAGE ~~STORY~~

Bad: DIDN'T DO MUCH WORK

Lewis -

Good: ~~That~~ Designed architecture and did a lot of work

Bad: Need better communication and commit programming concepts

Vincent -

Good: • Good wiki management

Bad: • Could've done more on implementing features

Jaron -

Good: • Clean code

Bad:

• Inefficient work (repeated features)

Li -

Good: I do learnt lots of programming skills

Bad:

I didn't do lots of works.

Imine -

Good: Researched and followed some scrum guidance

Good: Bad: Not formal enough in my organisation

## Team Review -

Biggest issue in sprint 1 was the git utilisation:

- > merge use / use of branches - conflicts
- > poor utilisation of issue tracker

Other issues:

- > pair programming inefficiency
- > poor work-load sharing

Successes:

- > Wiki is well structured and populated
- > Meetings have had good attendance
- > Majority of desired features have been made
